SUMMARY

Analytical and detail-oriented Data Science student skilled in Python, R, SQL, and machine learning. Passionate about transforming complex data into actionable insights that drive business growth and innovation.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, MATLAB

Frameworks: Scikit-Learn, TensorFlow, PyTorch, Keras, Matplotlib, Seaborn, XGBoost

Tools: VS Code, LeetCode, Jupyter, Google Collab, Git

Core Concepts: Data Analysis, Machine Learning, Deep Learning, Statistics, Object Oriented Programming

Soft Skills: Problem Solving, Analytical Thinking, Leadership, Collaboration, Quick Learner, Proactive

PROJECTS

Bitcoin Price Prediction Using LSTM Neural Networks

May 2024 – Aug 2024

Deep Learning Project

Python, TensorFlow, LSTM, NumPy, Pandas

- Developed a deep learning model using **LSTM networks** to forecast Bitcoin closing prices from historical BTC-USD data
- Applied **data preprocessing, normalization (MinMaxScaler), and time-series windowing (60-day lookback)** for model training
- Evaluated and compared multiple LSTM models using **RMSE and visual performance analysis**

EDUCATION

Harcourt Butler Technical University

Kanpur, India

BS-MS in Mathematics and Data Science

Aug 2023 – May 2028

Onkareshwar S V N I C

Kanpur, India

Intermediate

July 2022 – July 2023

CERTIFICATIONS

- **Python Bootcamp**, IES's Management College and Research Centre
- **Applied Machine Learning Using Python**, NIT Kurukshetra
- **Data Science Workshop**, Remarkskill Education (IIT Delhi)
- **Workshop on Mathematics and Data Science**, HBTU Kanpur

POSITIONS OF RESPONSIBILITY

Harcourt Butler Technical University

Kanpur, India

Training and Placement Representative

Oct 2025 – Present
